

# RM 40

## Heavy Offset Disc Cultivating Plough

**Value, strength and experience – when you add it up it's got to be Gibbins Rawling.**

Gibbins Rawling have been making ploughs since 1878 - over 100 years of experience! The RM 40 is one of the most popular of our wide range of offset and tandem disc cultivating ploughs, and when you study its features and price you'll see why.

- Great digging ability - ideal for primary and secondary tillage using 40 HP to 90 HP tractors.
- Twin pressure screws – each side can be adjusted individually.
- Easy gang adjustment for the perfect level finish.
- Solid cast spools individually machined to suit the disc for extra strength.
- Triple sealed bearings.
- 230mm (9") disc spacing.
- Fitted with 560mm x 5mm (22" x 3/16") scalloped discs.
- Weight where it counts - in the gang - not ballast on the frame (which adds load to the bearings) like most other machines.
- 28mm square high tensile gang bolts.
- Prong type scrapers are standard equipment - formed scrapers available on request.
- Fully adjustable drawbar – adjustable offset – ideal for orchards.
- Fitted with Holden type tyres.
- Optional extras (at additional cost) - ram and hoses for machine lift and jack.
