

Purchase Drive & Mount Separately

## HORIZONTAL BORER

Digga's horizontal borer mount allows an auger drive to be mounted horizontally onto an excavator and dropped below ground level for under road boring or reaming. It eliminates the removal of pavement or roadway for pipe and cable laying.

### Features:

- Use your existing Digga auger drive and excavator mount.
- Continuous Flighted Augers available.
  - > Available Lengths - 1200mm, 1500mm and 1800mm.  
Up to 2 X lengths can be used.
  - > Available Diameters - 150mm and 200mm.
- Extend the length of the continuous flight auger with the use of hex joiners and D-Clips.
- Replaceable pilots available.
- Australian Made Quality

### Suitability:

- Available for Digga drives PDD to PD10HF
- Excavators 2 to 10 tonnes
- Skid Steer and Mini Loader Horizontal Cradles also Available

AUGER DRIVE MODEL	CRADLE PART NUMBER
PDD - PDX2	HI-000522
PD3-PD7	HI-000519
PD8 - PD10	HI-003790
PD4HF - PD10HF	HI-001779
